

VACANCY:

TRAINEE PATENT ATTORNEY MECHANICAL / ELECTRICAL
IPECUNIA PATENTS - SITTARD

We are seeking to recruit a trainee patent attorney with a mechanical/electrical background. For this position we will consider both those who are already working in the patent attorney profession and new entrants to the profession.

Job description

The successful candidate will initially assist a patent attorney in our firm with a wide range of patent attorney work and gradually gain responsibility as their knowledge and experience grows. A high standard of training will be provided, as well as support in preparing for the Dutch and European qualifying examinations. Training will predominantly be provided in-house, but trainees are encouraged to attend appropriate external courses.

Requirements

We are looking for reliable and personable candidates with strong analytical and communication skills, the ability to pick up complex technical ideas quickly, and an attention to detail. We are looking for a team player.

For this position, applicants should ideally have a good degree in mechanical /electrical or similar. A reasonable level of knowledge of computer software would be an advantage.

Our firm

Ipecunia Patents BV is a young and dynamic patent firm which supports clients with passion in the protection of their IP, giving strategic advice and support in generating value of this IP. We have a positive minded international team which has multiple years of experience working in industry as well as many years of experience in the world of patents. We believe in a healthy work-life balance, which is translated in flexible working hours.

Ipecunia Patents offers a challenging and rewarding work environment, and also welcomes candidates from outside of the Netherlands.
